

Large Dog Area at C.L. Mugrage Park

Medina County
Park District

Closed October 10-13

Dear Dog Park Visitors,

For the safety of visitors and pets, the large dog area will be closed October 10-13 while several improvements are made. These include:

- Installation of a water line for filling the pond
- Installation of a pond aeration system to improve water quality
- Placement of large landscaping stones in the pond for dogs to climb and to give the pond a more natural appearance
- Addition of gravel around the pond and on trails where the ground is often muddy in wet weather

Please remember large dogs are not permitted in the small dog area. Because it is late in the season and the pond would customarily be drained for the winter, it will not be refilled until spring.

A survey of dog park users conducted earlier this year found an enthusiastic majority wanted to see the pond return with improvements to enhance water quality. Medina County Park District is grateful for your patience as it works to make the dog park better for you and your pet.

Thank you for visiting and for supporting Medina County parks!
