VI. DIRECTOR/STAFF REPORTS

- C. Chippewa Lake
 - 1. Mr. Slogar of Muskingum Watershed Conservancy District (MWCD) explained that the Chippewa Subdistrict of MWCD was established in 1960 to manage and maintain the Chippewa Flood Control Project to reduce flooding along the 33 miles of channel within its jurisdiction.
 - a. He talked about easement boundaries and responsibilities and explained that MWCD is not interested in expanding the current subdistrict boundaries at this time.
 - 1. Capital Projects Coordinator James explained that records indicate the original owner of Chippewa Lake, Parker Beach, would not enter into easements with MWCD to include Chippewa Lake in the subdistrict's boundaries.
 - b. Mr. Slogar answered various questions and offered MWCD's assistance with any projects that fall within the subdistrict's boundaries.
 - 2. Carter Bailey of Aqua Doc explained that the park district had contracted with his company to analyze the water quality of Chippewa Lake and investigate the reoccurring algal blooms.
 - a. He identified the four largest watersheds around the lake used for sampling points; explained the different depth zones within the lake and how the thermal stratification process results in loss of oxygen – which releases phosphorus from the bottom of the lake that feeds the blooms.

- b. Mr. Bailey noted that Aqua Doc is still in the sampling phase of the study. He explained that the goal of the study is to identify problems and offer management options to best apply mass balance to the lake.
- c. Director Eppink reiterated that this is a complex issue, and there is no quick fix to the problem.
- d. Chairman Neate thanked everyone for attending. He summarized that, again, there is no quick, easy resolution to the algal bloom issue; however, the park district is engaging experts to study and determine the correct strategy for combating this substantial problem.
 - 1. Natural Resource Manager Spetz and all guests except Bill Peterson left the meeting at this time.

III. PUBLIC PARTICIPATION

- A. Bill Peterson of Precision Geophysical, Inc. explained that his company conducts oil testing for companies such as MFC and King Drilling. His company is preparing to conduct testing around the park district's Mud Lake Road property and requested permission from the board to include the park district's property in the testing sites.
 - 1. Capital Projects Coordinator James explained that he believes permitting such activity would be in violation of an agreement the park district executed with the Ohio Public Works Commission (OPWC) for receipt of Clean Ohio funding for the purchase of the property.
 - 2. The park district's legal counsel will review the OPWC agreement, and Director Eppink will contact Mr. Peterson with the determination.
